#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_.
- 2a) This action is FINAL.                            2b) This action is non-final.

## **DETAILED ACTION**

### *Claim Objections*

1. Claim 1 is objected to because of the following informalities: claim 1 recites the limitation "said dispensing outlet chamber" in lines 7 and 8. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,046,288 to Bergman.

Bergman shows a plural chamber dispenser as seen in Figs. 1 and 7, having a housing 12, an dispensing opening 38 outwardly accessible from an exterior surface of the housing, two cylindrical components 16 and 18 with in the housing, openings 40 and 42 connecting the components with the dispensing outlet, threaded shafts 62, support means 20, first and second rotatable control mechanism 28, a third rotatable control mechanism 26, a mixing chamber 14 curved at the top, a spout 14' inserted at the bottom and a base support 134 as seen in Fig. 7 and a closure 32 for the rotatable controls.

With respect to claims 12 and 13, the compartments can have different volumes and the spacing of the shaft may be different to accommodate the different sizes of the compartment, see column 5, lines 59-65.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,046,288 to Bergman in view of US 6,013,270 to Hargraves.

Bergman shows all claimed features as claimed above but is silent about providing a handgrip. Hargraves shows a container to be grip by the hand of the user with an ergonomic shape. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Bergman to include a recess to provide a comfortable and easy gripping by a human hand as taught by Hargraves, see column 20, lines 58-62.

***Allowable Subject Matter***

6. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brazell was considered with respect to claim 14, the element 102 constitutes a retainer for the gear mechanism but is not part of the housing nor is of conical shape. Sakurai

Art Unit: 3754

shows a creamy substance dispenser. Thayer shows a mechanical twist dispenser. Bergman ('566) shows a captive mixing cap.
